

CRR Audit History

Background

In current setup/build till now, we are not capturing the audit log for each user action at one common place/table. We do have separate tables for status tracking of different components like, Assessment, Fundamental Assessment and Assests.

However, it would be a good idea to keep log of every user action at one place for clear auditability and it will also help build cleaner solution for notification feature that product came up with in PI 25.4 where user wants to see everything that is happenning in CRR in reverse chronological order.

CRR User Journey States and Status Tracking - Current Picture

	State	Local Audit Logging at Cloud SQL	Cloud SQL Table	RTF Event	Comments
1	Sandbox Created	YES	risk_asse ss_sta_trk	NO	
2	Rules added/updated/Deleted	NO	risk_rule	NO	No separate audit log maintained. However, information on what rules were changed can be extracted from rules table.
3	Sandbox Rolled Back	NO		NO	No separate status for roll back. A new version of sandbox/assessment is created by copying from one previous version.
4	Sandbox Submitted	YES	risk_asse ss_sta_trk	YES	
5	Sandbox Completed	YES	risk_asse ss_sta_trk	YES	
6	Sandbox Cancelled	YES	risk_asse ss_sta_trk	YES	
7	Sandbox Merge Requested	YES	risk_asse ss_sta_trk	NO	
8	Sandbox Merge Approved Level 1	YES	risk_asse ss_sta_trk	NO	
9	Sandbox Merge Rejected Level 1	YES/NO	risk_asse ss_sta_trk	NO	There is no identification in the log entry whether rejected at Level 1 or Level 2 approval. However, info can be extracted by looking at the previous status.
10	Sandbox Merge Approved Level2 / Sandbox Merged to Production	YES	risk_asse ss_sta_trk	YES	
11	Sandbox Merge Rejected Level 2	YES/NO	risk_asse ss_sta_trk	NO	There is no identification in the log entry whether rejected at Level 1 or Level 2 approval. However, info can be extracted by looking at the previous status.
12	New Draft Asset Created	YES	asset_sta _trk	NO	1. New Asset is always created with status as Sandbox.
13	Draft Asset Deleted	YES	asset_sta _trk	NO	If an asset is being used in any of the rules in any of the assessments, those rules will be removed from the assesment
14	Draft Asset Updated	NO	asset_sta _trk	NO	Inline update in the asset
15	Production Asset Updated - New Draft Version Created	YES	asset_sta _trk	NO	
16	Production Asset Updated - Sandbox Execution Skipped	YES	asset_sta _trk	NO	
17	Asset Merge Requested	YES	asset_sta _trk	NO	
18	Asset Merge Approved/ Asset Merged to Production	YES	asset_sta _trk	NO	
19	Asset Merge Rejected	YES	asset_sta _trk	NO	
20	Asset Change Sandbox Created	YES/NO	risk_asse ss_sta_trk	NO	No explicit identifier if the sandbox was created from Asset Change flow/screen

21	Asset Change Sandbox Submitted	YES/NO	risk_asse ss_sta_trk	YES	No explicit identifier if the sandbox was created from Asset Change flow/screen
22	Asset Change Sandbox Merge Requested	YES/NO	risk_asse ss_sta_trk		No explicit identifier if the sandbox was created from Asset Change flow/screen
23	Asset Change Sandbox Merge Approved Level 1	YES/NO	risk_asse ss_sta_trk	YES	No explicit identifier if the sandbox was created from Asset Change flow/screen
24	Asset Change Sandbox Merge Rejected Level 1	YES/NO	risk_asse ss_sta_trk	NO	No explicit identifier if the sandbox was created from Asset Change flow/screen
25	Asset Change Sandbox Merge Approved Level 2/ Asset Change Sandbox Merged	YES/NO	risk_asse ss_sta_trk	YES	No explicit identifier if the sandbox was created from Asset Change flow/screen
26	Asset Change Sandbox Merge Rejected Level 2	YES/NO	risk_asse ss_sta_trk	NO	No explicit identifier if the sandbox was created from Asset Change flow/screen
27	Asset Change Sandbox Cancelled	YES/NO	risk_asse ss_sta_trk	YES	No explicit identifier if the sandbox was created from Asset Change flow/screen
28	Asset Change Sandbox Completed	YES/NO	risk_asse ss_sta_trk	YES	No explicit identifier if the sandbox was created from Asset Change flow/screen
29	Fundamental Assessment Created	NO		NO	In PI 25.4, FA will be created from the backend by populating POD data in POA tables
30	Fundamental Assessment Questionnaire Updated	YES		NO	No expliciting logging. However, modification details can be extracted from the assessment questionnaire table
31	Fundamental Assessment Rescored for <GATE>	NO		NO	Can be extrctared from the underlying answer and score table
32	Fundamental Assessment Updated - Sandbox Execution Skipped				
33	Fundamental Assessment Change Sandbox Created			NO	
34	Fundamental Assessment Change Sandbox Submitted			YES	
35	Fundamental Assessment Change Sandbox Merge Requested				
36	Fundamental Assessment Change Sandbox Merge Approved Level 1				
37	Fundamental Assessment Change Sandbox Merge Rejected Level 1				
38	Fundamental Assessment Change Sandbox Merge Approved Level 2/ FA Change Sandbox Merged				
39	Fundamental Assessment Change Sandbox Merge Rejected Level 2				
40	Fundamental Assessment Change Sandbox Cancelled			YES	
41	Fundamental Assessment Change Sandbox Completed			YES	

Proposed Approach

We should have single place to look at all change history in cronological order. This will benefit in below use cases:

1. **Production Support:** Easy visibility on activity trail for support purposes.
2. **Reporting:** This can feed data for various CRR reporting requirements that are based on GCIP events.
3. **UI Notifications:** UI level notification feature that product brought where user can see any change that has happened in the system in chronological order (which for now was re-scoped to lastet status of each sandbox) can also source the data from this logging.

	Attribute Name	Data Type	Nullability	Defaults	Sample values
1					
2					
3					
4					
5
