Multiple Sandbox Execution in parallel
Development of UI Screens on OPF/ISP (OneApp)
Integration of UI with APIs
Integration between BQ and Cloud SQL DB

Questions
What will the structure of data that would be sourced from DAM (will it be in a single row)
How will the data be published by the Event Sourcing (ES)
Will there be any cross referencing for SOR to Compliance mapping be required

Do we need to publish an event in case of score change, what all info will be required
Output for CRR has to be sent back to DAM or will a separated ODL will be maintained for CRR
Review scheduling to be done in case of score change by CRR
