

2024 Year-End Performance Check-In

Review Period 1/1/2024 - 12/31/2024

REVIEWER

Anuj Kathwariya (Manager)

Satvik Jain

Sr Assoc-Digital Product Mgmt
Job Title

Overview

Task Instructions

Colleagues: To prepare for your Year-End Performance and Development Conversation, use the Self-Assessment tool to reflect on how you are delivering in your role and capture your accomplishments and impact to date. Complete your self-assessment describing your most significant accomplishments and business impact, as well as how you achieved those results using our [Leadership Behaviors](#). Then share your key learnings for the year. Once completed, download your self-assessment and use it with your Career & Development Plan, to guide your conversation.

Leaders: Meet with your colleague and have them walk you through their self-assessment. Share specific feedback supported by examples on their performance against their goals and Leadership Behaviors, as well as their [Career & Development Plan](#). Align on any additional milestones to be met by the end of the year and any support they need from you. **Please note:** You should not discuss performance designations and compensation decisions during this conversation. You will communicate final decisions to your colleague during Year-End Performance and Compensation Conversations in February 2025.

Refer to the [Navigator User Guide](#) for detailed instructions on how to complete the Year-End Check-In in Navigator.

Self-Assessment Goals

1. Modernization of CRR (SLPM)

1. By November, I will collaborate on the PRD to finalize the scoping and detailed documentation of the features to be delivered in the SLPM Program for GCIP
2. By December, I will gain a clear understanding of the SLPM roadmap and product initiatives and ensure an understanding of the process and working rhythm by working with agile champions and scrum masters
3. By January, I will lead the development of the SLPM product features by creating capabilities, features, and user stories, ensuring end-to-end testing, and implementing feedback to improve the user experience
4. By February, I will position myself as the go-to person for Cadence SLPM and continue to lead the Modernization for CRR working with my cross functional design, tech and business stakeholders

Start Date
7/30/2024

Due Date
12/31/2024

Comments:

Satvik Jain (Self) :

1. Documented 6+ Capabilities and 15+ Features creating an initial draft of the PRD for CRR Modernization for PI 25.1 by coordinating with the Business team and respective stakeholders

2. Delivered 2 features in PI 24.4 and leading the development of 5 features in PI 24.5 creating 67 User Stories on Rally by collaborating with engineering teams following Agile best practices.
3. Organized 7+ meetings to get clarity on working rhythm and process to be followed for the SLPM program working with designers, cross functional product teams, business team and data science teams while also leading exploration of features to be future ready for the modernization of Cadence.

2. Gain Expertise on Cadence

1. By November, I will develop a comprehensive understanding of Cadence's core features and architecture by attending walkthroughs and reviewing documentation
2. By December, my goal is to Identify and document Product features that are critical for Cadence modernization, ensuring alignment with the business objectives
3. By January, I will Lead the development of product features for Cadence, by creating capabilities, features and user stories, ensuring end to end testing, and timely releases

Start Date
7/30/2024

Due Date
12/31/2024

Comments:

Satvik Jain (Self) :

1. Attended 10+ KT sessions with multiple product and business stakeholders to understand Cadence's capabilities and existing architecture.
2. Assisted with Requirements gathering for 6+ Data sources understanding existing Data sourcing features of PI 24.4 and capturing new data sourcing requirements for PI 24.5
3. Actively working on creating a repository of learning resources to reduce learning curve for future Cadence new hires to get them up to speed quicker.

3. Product Management & Agile Knowledge

1. By October, I will deepen my understanding on Rally, JIRA and Agile methodologies and document all user stories and features adhering to the best practices suggested by the Agile Champions and Scrum masters
2. By November, I will complete a course in AI Product Management to identify areas of opportunity to integrate AI within the SLPM modernization product initiatives
3. By December, I will complete a Scaled Agile certification to further develop my skills in backlog prioritization and user story refinement, applying those concepts in team discussions.
4. By January, I will collaborate with the agile champions and ART Engineers to develop a good fundamental understanding of the Sprint/PI/Release management process

Start Date
7/30/2024

Due Date
12/31/2024

Comments:

Satvik Jain (Self) :

1. Documented 7 features and 67 User stories while also creating a standard best practice template for writing feature and user story descriptions by working with the Agile Team
2. Leading an AI model-based risk scoring POC by working with the AIDA team utilizing learnings from the AI product management course

4. Building Cross-Functional Relationships

1. By October, I will map out key stakeholders (across business, compliance, engineering, and operations) involved in the SLPM and Cadence projects and develop a clear understanding of the team structure, roles, and responsibilities
2. By December, I will complete check-ins with key stakeholders to stay aligned on project progress, documenting feedback and capturing follow-up actions.
3. By January, my goal will be to support on a collaborative Cross Learning session with other teams in GRC to increase awareness about Cadence, the SLPM vision, and the work that our team does on a day-to-day basis.

Start Date
7/30/2024

Due Date
12/31/2024

Comments:

Satvik Jain (Self) :

1. I have successfully familiarized myself and established a working relationship with my key stakeholders.
2. I have also setup weekly/ bi-weekly and monthly meetings with Business Team, Tech and Design team and my cross functional product teams to ensure continuous progress on product initiatives
3. Aligned and completed my first check-in with my Product Management mentor who is a Senior Product Manager here at Amex.

5. I-Refresh Program

1. By January, my goal is to support modernization gaining complete understanding of the I-Refresh program by shadowing and participating in discussions with key stakeholders
2. By February, my goal is to collaborate with the I-Refresh team to deepen my understanding on their product roadmap and assist the product managers with the development of product features for I-Refresh

Start Date
7/30/2024

Due Date
12/31/2024

Comments:

Satvik Jain (Self) :

1. Attended 3 KT session for I-Refresh with the Product Managers to enrich my understanding of the I-Refresh initiative.

6. Cross Learning from other Teams

1. By H1 2025, my goal is to shadow and support the development of AI driven features of GCIP for example - Digital

Screening Assistant

2. By H2 2025, my goal is to job shadow the Data Science team to understand how they work
3. By H1 of 2026, my goal is to pick up few side-projects with the Data science team and work with them to deliver measurable value to the business

Start Date

7/30/2024

Due Date

12/31/2024

Comments:

Satvik Jain (Self) :

1. I have attended 3 KT session with the Product Manager working on these features and I have a bi-weekly touchpoint where I am clarifying my doubts and queries about the overall GCIP vision.
2. I have started working with the Data science team for POC for Machine Learning driven risk scoring calculations using a Model.

Self-Assessment: Leadership Behaviors

Provide specific examples for Set the Agenda, Bring Others With You, Do It the Right Way

Comments:

Satvik Jain (Self) :

Set the Agenda:

1. Took ownership and additional responsibility of a PM in addition to being a Product Owner for CRR Modernization leading product initiatives
2. Worked with Agile Champions to identify and document improvements in feature and user story documentation on Rally and improve quality of documentation

Bring Others with You:

1. Actively collaborating with cross functional teams like Design, Tech and Business to plan and complete the grooming for the upcoming product initiatives well in Advance
2. Working with Data Science teams to explore future opportunities of leveraging AI and Automation in Cadence.

Do it the Right Way:

1. Setup weekly and biweekly connects with Business team and monthly connects with cross functional product, tech and design teams to align on the upcoming product initiatives.
2. Incorporated feedback received from Agile Champions and Tech stakeholders, addressing conflicts at work professionally, ensuring improvement in our Operating rhythm and building trust with my Scrum team.
3. Outside of work, Won the 1st Prize in Rangoli competition during the CFR-GRC Diwali event leading the Ideation, Execution and Presentation of the Winning art, leading a team of 25+ people and strengthening the concept with American Express's Leadership Values on my Winning speech.

Self-Assessment: Reflection on the Year

What are your key learnings this year?

Comments:

Satvik Jain (Self) :

1. I learnt that it is important to address conflicts at work professionally, without being defensive and without taking it personally to establish a long-term working relationship with your stakeholders. The Learnings sunk in deep when there were questions raised on the Product Team for not performing good in terms of PI readiness. Though I realized that improvements had to be made in the existing processes, I kept my nerves calm during a heated escalation which happened during the PI planning call, responding logically instead of reacting defensively, being solution oriented and even surprised myself by handling the situation in an extremely professional way.
2. I learnt the Importance of giving and taking feedback from my peers and I will work on it actively to make sure I improve as an Individual contributor and as a Leader. Few things that I have improved, and I am actively trying to get better at is time management, taking ownership, being a people person to work with scrum teams and being an active listener.
3. I learnt the importance of communicating frequently, candidly and clearly and to ensure keeping each and every stakeholder aligned when it comes to delivering value and results as a team.
4. I learnt the importance of having the right mentors in your career as the right mentor can either make or break your career, and am actively working with my PM mentor to help me navigate my career path.
