

Analysis of Events Required for Reporting BRD

This document refers the [Reoprtng BRD](#) shared by [Satvik Jain](#) and identifies for what all requirements CRR should be responsible for sending the RTF events and what all to be addressed by DAM or Reporting team.

Reports

Refer highlighted columns at the end for the comments from CRR team on each item from the reporting BRD [Satvik Jain Suprana Sengupta Pallavi Sharma2](#)

#	Global/Local	Function	Phase	Report Name	Description	Category	Type	Frequency	Existing in GAITS (Y/N)	Indicative Fields (To be modified based on the target state)	Additional Fields (for Self Service Reports)	Reviewed [Y / N / WIP]	Comments
R9	Global	CRR	General	Market level CRR Sanbox vs Production Comparison	Comparison between Sandbox & Production environment on number of customers for a particular market. System should provide user ability to filier the report based on following paramters: - Market - Legal Entity - Customer Type Note: System should display Enterprise level scoring by default with an ability to toggle to Legal Entity scoring. (The different level of reporting to be validated against the use case in CRR BRD overtime)	MIS	Self service	1. As required	N	- Market - Legal Entity - Sandbox Environment Details for each of Low, Medium & High Risk Customers - Total Number - Percentage - Production Environment Details for each of Low, Medium & High Risk Customers - Total Number - Percentage - Percentage Movement (Sandbox % - Production %) - Customer Movement (Sandbox - Production)	NA	Y	CRR will produce the aggregated stats including the mentioned attributes for sandbox and production in separate output tables in Lumi data warehouse. Reporting team can build the necessary comparison /reports using that data. Detailed score at account and customer level would also be available in the data warehouse NOTE: In phase 1, CRR is not scoping the stats to publish to data warehouse.
R10	Global	CRR	General	Product-wise CRR Sanbox vs Production Comparison	Comparison between Sandbox & Production environment on number of customers for a particular market, product, Legal entity. System should provide user ability to filier the report based on following paramters: - Market - Legal Entity - Product - Customer Type Note: System should display Enterprise level scoring by default with an ability to toggle to Legal Entity scoring. (The different level of reporting to be validated against the use case in CRR BRD overtime)	MIS	Self service	1. As required	N	- Market - Legal Entity - Product - Total Number & Percentage of Low Risk Customers in Sandbox - Total Number & Percentage of Low Risk Customers in Production - Total Number & Percentage of Medium Risk Customers in Sandbox - Total Number & Percentage of Medium Risk Customers in Production - Total Number & Percentage of High Risk Customers in Sandbox - Total Number & Percentage of High Risk Customers in Production - Percentage Movement (Sandbox % - Production %) - Customer Movement (Sandbox - Production)	NA	Y	Same as R9

R11	Global	CRR	General	All customers triggered for a risk element	Number of customers triggering for a risk element and corresponding multiplier/risk points Note: System should display Enterprise level details by default with an ability to toggle to Legal Entity details. (The different level of reporting to be validated against the use case in CRR BRD overtime)	MIS	Self service	1. As required	N	- Risk Category - Risk Element (Risk Points) - Risk Rating - Total number of Customers	NA	Y	CRR will produce the account and customer level score drill down at category and risk element level. Note - Sandbox results drill down can be considered for publishing in Phase 1. However, production scoring result drill down is not scoped for publishing in phase 1
R12	Global	CRR	General	CRR Scoring Matrix	Customer risk rating scoring matrix Note: System should display Enterprise level details by default with an ability to toggle to Legal Entity details. (The different level of reporting to be validated against the use case in CRR BRD overtime)	MIS	Self service	1. As required	N	- Sort - Risk Category - Risk Element - Scoring Method - Issuing - Individual - Entity - Intermediary - Acquiring - Merchant - Sandbox - Weighting - Def. - Mult. - Max - Multiplier - Points - Multiplier - Rule	NA	Y	Need more clarity on the requirement
R13	Global	CRR	General	Fundamental Assessments / Centralized Lists / Notable Lists Changes	Report to capture any changes in the Fundamental Assessments / Centralized Lists / Notable Lists This should be available at the following levels - Enterprise - Center/Market specific - Product - Legal Entity	MIS	Self service	1. As required	N	- Value added - Date & Time - User Details - Event (Details of what happened) - List Name	NA	Y	■ CRR to send RTF events as part of edit feature of Asset manage to include details of changes done in the list. ■ On every implementation success of Fundamental Assessment, CRR to send the RTF event including the details of old and new score.
R14	Global	CRR	General	Audit trail	Audit trail for all changes in the risk points for a particular customer Note: System should display Enterprise level details by default with an ability to toggle to Legal Entity details. (The different level of reporting to be validated against the use case in CRR BRD overtime)	MIS	Self service	1. As required	N	- User Name - Time Stamp - Status - Comments	NA	Y	CRR will only be publishing the scores in its own output tables in the Lumi data warehouse. Reporting team needs to collaborate with DAM team to identify change in customer score and send RTF events with mentioned details.

R15	Global	CRR	General	Implementat ion Tracker	Report to track the implementation of changes	MIS	Self service	1. As required	N	- Project Name - Category - Market - CRR - Request ID - Elements /Rules - Start Date - Finish Date - Implementation Date - Duration (in days) [Implemntation Date - Finish Date] - Event (Details of what happened) - Status - In Production	NA	Y	■ What is CRR Request ID? Is it assessn ent id? ■ What is Start Date refers to? Is it Sandbo: creation date? ■ What is finish date anc Impleme ntation date? ■ What level of details required under Event attribute ■ What is the expected in "In Producti on" attribute Note: Once clear on attribute menaing, CRR needs to work on the event schemas for the rule change
R16	Global	CRR	General	CRR Raw Data Report	Report to provide the raw data for CRR	MIS	Self service	1. As required	N	User should be able to pick and choose the data fields specified in the CRR Minimum Data Requirements BRD v2.0	NA	Y	Need more clarity on the requirement
R17	Global	CRR	General	CRR Data Quality Report	Report that details out any breaks or issues noted in the processing of the CRR data. Criteria - Market - Region - Legal Entity - Time period - Product type - Product Category	MIS	1. Batch 2. Self-service	1. Monthly 2. As required	N	- Attribute at SOR - Volume Impacted - Fill rates - Valid Fill Rates - Total Count - Total Fill - Total valid fill - Criticality - Sensitive Data Element - Market - Region - Legal Entity - Product type - Product Category - Time period	NA	Y	■ It should be more on DAM side. ■ Need more discussi n to underst and the action items fo CRR
