Welcome to Global Risk & Compliance Technology

Ted Hackman is Vice President of Global Risk & Compliance Technology, leading enterprise efforts to support the American Express Risk & Compliance, Internal Audit & Privacy lines of business.

The GRCT winning aspiration is to leverage product and technology expertise to steward a world-class risk-management framework, empowering colleagues to make informed, secure growth decisions, which fosters a trusted brand.

Ted has been with American Express for more than 20 years, starting in 2001 as a System Administrator in International Marketing Capabilities, then moving into Risk Technology before joining the Financial Data Engineering team as a VP in what is now Corporate Technology, where he led the Advanced Accounting, Regulatory Risk & Reporting, Treasury, Tax and Dev Ops Engineering teams.

Ted has a history of driving the delivery of large, global, complex, and multi-year technology solution programs from inception to finish, through strong collaboration with business and technology partners. He earned a BS from Arizona State University ("Go Sun Devils") and is originally from Kansas. Ted resides in Phoenix with his wife Amanda and their 11-year-old daughter Alyssa.

GRC Technology

GRCT "winning aspiration"

Leverage product and technology expertise to steward a world-class risk-management framework, empowering colleagues to make informed, secure growth decisions, which fosters a trusted brand.

We protect American Express with systems that perform rating, screening, and monitoring of customers and transactions for patterns of fraud, bribery, corruption, money-laundering, or other misuse of Amex products."

Where We Will Win

Where We Choose to Play...

OUR PROCESSES:

 Product Ownership & Development Process An optimized and efficient development process allows us to deliver more by reducing waste and increasing flow	 Investing in Team Members Product and technical teams power our success when they know their business (KYB) and grow their careers	 Architecture, Engineering & Strategy Roadmap Intentional decisions that align with our strategy and architecture are our choice. We streamline decision-making by empowering decisions at all levels
---	---	---

RISK FRAMEWORK:

 Data Management and Governance Having complete, accurate and organized data drives informed Risk decisions and business agility	 Business Rules & Logic Effectively capturing, changing and executing business logic results in accurate insights and actions	 Reporting, Analytics & Data Publication Simple, easy to understand, accessible reporting and analytics facilitates and supports informed and timely decision-making	 Case and Workflow Management A core capability of the Risk Framework is workflow of alerts to completion. We emphasize the importance of User Experience and Speed
